

We Will Solve Your Mobility Problems

Nutting®

Division of Acco Chain & Lifting Products

The Nutting Hybrid Trailer offers the tracking of a fifth wheel quad-steer and the ease and maneuverability of a platform truck. Traditionally, any quad-steer trailer is difficult to move manually. You have to straddle the tongue, bend over while pushing or pulling the trailer into position. This is awkward with the potential for a back injury. But, the 'Hybrid's' ergonomically correct method of maneuvering the trailer keeps you safe from injury. The only thing you have to do is lift the tongue and latch it in the upright position. This locks out the quad-steering mechanism and the 'Hybrid' now becomes a platform truck.
